Knowledge check

2 minutes

1. What can be a combination of alphanumeric characters and can include an underscore as long as it's not placed at the beginning?

☐ Tags☒ Variables 

This answer is correct. Variables can be a combination of alphanumeric characters and can include an underscore as long as it's not placed at the beginning.

☐ Filters

2. When it's used as a filter, what returns a number of elements in a list?

☐ `capfirst`☐ `block title`☒ `length` 

This answer is correct. When `length` is used as a filter, it can return the number of elements in a list.
