Search by name... 

Functions should not have too many lines of code
 Code Smell
Track uses of "NOSONAR" comments
 Code Smell
Track comments matching a regular expression
 Code Smell
Statements should be on separate lines
 Code Smell
Functions should not contain too many return statements
 Code Smell
Files should not have too many lines of code
 Code Smell
Lines should not be too long
 Code Smell
Methods and properties that don't access instance data should be static
 Code Smell
New-style classes should be used
 Code Smell
Parentheses should not be used after certain keywords
 Code Smell
Track "TODO" and "FIXME" comments that do not contain a reference to a person
 Code Smell
Module names should comply with a naming convention

Track comments matching a regular expression

Analyze your code

 Code Smell

 Major 

This rule template can be used to create rules which will be triggered when a comment matches a given regular expression.

For example, one can create a rule with the regular expression `. *REVIEW. *` to match all comment containing "REVIEW".

Note that, in order to match REVIEW regardless of the case, the `(?i)` modifier should be prepended to the expression, as in `(?i) . *REVIEW. *`.
