Functions should not have too many lines of code

Code Smell

Track uses of "NOSONAR" comments

Code Smell

Track comments matching a regular expression

Code Smell

Statements should be on separate lines

Code Smell

Functions should not contain too many return statements

Code Smell

Files should not have too many lines of code

Code Smell

Lines should not be too long

Code Smell

Methods and properties that don't access instance data should be static

Code Smell

New-style classes should be used

Code Smell

Parentheses should not be used after certain keywords

Code Smell

Track "TODO" and "FIXME" comments that do not contain a reference to a person

Code Smell

Module names should comply with a naming convention

### New-style classes should be used

Analyze your code

Code Smell Minor python3

The new style of class creation, with the declaration of a parent class, created a unified object model in Python, so that the type of an instantiated class is equal to its class. In Python 2.2-2.7, this is not the case for old-style classes. In Python 3+ all classes are new-style classes. However, since the behavior can differ from 2.2+ to 3+, explicitly inheriting from object (if there is no better candidate) is recommended.

#### Noncompliant Code Example

```
class MyClass():
    pass
```

#### Compliant Solution

```
class MyClass(object):
    pass
```
